---

We believe that your business is an important link to those in the planning and landscape architectural professions. This golf tournament is intended to be a recreational and social event that will foster and strengthen the strong linkages between the two professional associations and related businesses and industries.

Proceeds from the golf tournament will support two awards granted to one Master of City Planning student and one Master of Landscape Architecture student at the University of Manitoba.

We are kindly requesting your support through the sponsorship packages detailed below. Your participation will be acknowledged through exposure and promotion to planners, landscape architects, and related business and industry friends.

Thank you for your consideration. Should you wish to participate, please contact Aaron Hirota at 956-0396 or either of our professional association offices.
