COVID-19 National Survey Summary – April 24, 2020

Page 2 of 2

How has work changed with COVID-19?

- 62% are working in a different location (from home, alternate office, etc.)
- 4% have been laid off (1.5% permanently)
- Respondents reported a broad range of changes to work volume compared to before COVID-19, averaging slightly less than normal work volume (92% of normal volume)

What would respondents like to see from their Associations?

- Top priority: more online professional educational events
 - Lists of local businesses, suppliers, employees that need support
 - Flexibility in collecting and recording continuing education
- Support and advocacy:
 - Employment resources for recent graduates and unemployed people
 - Mental health and wellness resources
 - Advocate for landscape architecture as a valuable profession, especially in helping during post-Covid-19 transitional period
- Mixed opinions on Covid-19-related communications and events
 - Want: updated information on essential services and what practices are/are not allowed, best practices during Covid-19, information summaries relevant to landscape architecture
 - Do not want: general Covid-19 information that is available on government websites

What do respondents want to be asked next?

- How has Covid-19 affected your productivity and overall mental health?
- Will you find it difficult to pay your membership dues for next year?
- Will you find it difficult to fulfill your continuing education requirements?
- How do you envision Covid-19 impacting landscape architecture work in the long term, after the pandemic is over?
